PROFESSIONAL SUMMARY

MCA student with academic project experience in Python-based data analysis and web application development. Familiar with data cleaning, exploratory analysis, visualization, and database-driven applications. Eager to apply analytical thinking and programming fundamentals while continuing to learn.

EDUCATION

Master of Computer Applications (MCA) — Pursuing

Bachelor of Computer Applications (BCA) — Completed | 2023–2026

INTERNSHIP EXPERIENCE

Data Analytics Intern — Unistar Softech Pvt. Ltd., Bardoli

120-hour internship | Data Analytics Department

- Gained practical exposure to data analytics workflows and working with datasets.
- Practised organizing, analysing, and presenting data as part of internship learning.

PROJECTS

Flight Data Analysis — Python, Pandas, Data Visualization, Machine Learning

Analysed flight data, explored data quality and patterns, created visualizations, and experimented with regression and price-category classification models.

CookCraft — PHP, MySQL, HTML, CSS, JavaScript

Developed a recipe web application with database-backed features for organizing and exploring recipes.

Cook-Delight — React, SQL

Created a food-related application using React for the interface and SQL for data storage.

TECHNICAL SKILLS

Programming & Web: Python, PHP, JavaScript, HTML, CSS, React

Data Analytics: Pandas, data cleaning, exploratory data analysis, data visualization, introductory machine learning

Database & Tools: MySQL, SQL, Git, GitHub, VS Code

STRENGTHS

Analytical thinking • Problem-solving • Willingness to learn • Project-based learning
